SUMMARY

B.Tech Computer Science student specializing in Artificial Intelligence and Machine Learning. Skilled in Python, Machine Learning, Natural Language Processing (NLP), and Data Visualization. Strong foundation in data preprocessing, feature engineering, and model optimization. Passionate about solving real-world problems using data-driven approaches and continuously improving technical skills.

Relevant Coursework

Data Structures • Algorithms Analysis • Machine Learning • Database Management • Software Engineering • Computer Architecture

EDUCATION

Jaypee University of Engineering and Technology — Aug. 2024 – May 2028
Bachelor of Technology in Computer Science — Guna, Madhya Pradesh

Gomti Nandan Public School — 2024
Class XII (CBSE) — Bina, Madhya Pradesh

Gomti Nandan Public School — 2022
Class X (CBSE) — Bina, Madhya Pradesh

PROJECTS

Heart Stroke Prediction System | *Machine Learning* **GitHub**

- Built a machine learning classification model to predict stroke risk, achieving **86.4% accuracy** and **0.88 F1-score**.
- Evaluated and compared 5 ML algorithms (Logistic Regression, KNN, SVM, Naive Bayes, Decision Tree) to optimize performance.
- Performed data preprocessing including handling missing values, encoding, and normalization to improve model reliability.
- Conducted exploratory data analysis (EDA) to identify key health factors influencing stroke risk.
- Designed a simple interface for real-time patient data input and prediction output.

Crop Yield Prediction System | *Machine Learning, Streamlit* **GitHub**

- Developed a crop yield prediction model using agricultural data, achieving an **R^2 score of 0.96**.
- Optimized a Random Forest model for accurate predictions on environmental and agricultural datasets.
- Applied data preprocessing techniques including missing value handling, encoding, feature scaling, and transformation.
- Conducted exploratory data analysis (EDA) to identify patterns between environmental factors and crop yield.
- Built an interactive Streamlit web application for real-time predictions and user input handling.

SKILLS

Languages : Python, Java, C, C++
AI/ML & Data : Machine Learning, Natural Language Processing (NLP), Data Visualization
Libraries/Frameworks : NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Tools : Jupyter Notebook, Google Colab, VS Code, Git, Streamlit
